Division of Information Technology

ROLE OF EACH MEMBER

- **Kunal Sisodia:-**

  1. Managed Main page html coding.
  2. Made the click here button for more information.
  3. Help designing the whole website.
  4. Added YouTube links videos.
  5. Managed the Appointment page CSS.

- Aman Patel:-

  1. Helped in the main page HTML.
  2. Helped in linking the backend images and links.
  3. Help in designing the whole website.
  4. Help in setting the layouts.
  5. Managed Main page CSS.

- Saurav:-

  1. Filled links in each Social Media.
  2. Designed Appointment page HTML.
  3. Helped in Main page CSS format.
  4. Do the whole navigation bar and header section.
  5. Designed header of the Home Page.

INTRODUCTION ABOUT PROJECT

The project on which this report based on is **BreatheFree:** *A Berok Zindagi* is an initiative that aims at helping asthmatics realise their true potential and live unstoppable lives. It is the largest initiative by Cipla to create awareness for Asthma by educating asthmatics about inhalers, thus encouraging asthmatics to openly accept and adopt inhalers to live a *#BerokZindagi*.

LET'S TALK ABOUT ASTHMA

Every asthmatic has their own success story to tell. Listen to the tales of asthmatics like Vikas Khanna and Parupalli Kashyap as they get candid with friends and loved ones to discuss their journey of being an asthmatic and how they came out as winners against asthma.

A TO Z OF ASTHMA

Learn the A to Z of asthma which everyone should know! A comprehensive guide on managing asthma, as Ayushmann Khurrana, Parupalli Kashyap, Vikas Khanna, doctors and patients join hands to create awareness about asthma. We are bringing this video to you as a part of a comprehensive glossary on asthma - Stay tuned as we bring you the next letter. #AtoZofAsthma.

Breathefree's BerokZindagi initiative has been organizing these camps every year, with the goal of reaching out to more and more people and to spread awareness on the simple message- **Asthma Ke Liye, #InhalersHainSahi.**

MAIN-PAGE DETAILS

1)Firstly link element allows authors to link their document to other resources using rel attribute naming the relationship of the linked document to the current document. If a element has an href attribute, then it represents a hyperlink. And using href for the png picture and type attribute to define the types of content linked to. In the title content attribute contains the value for the http-equiv or name attribute depending on which is used, here name is used which again defines the name of a piece of document-level metadata, here content is width=device-width, and scale=1. Again, link is used along with rel for hyperlinks for external css style.css.

2)In this Project : Breathefree – Berok Zindagi, we have used social sites of BreatheFree using the above link elements .
Social Sites used:

Facebook: https://www.facebook.com/iBreathefree

Twitter: https://twitter.com/iBreathefree

YouTube: https://www.youtube.com/channel/UC7kEgcZEUOhPeZ4TEHFjBkA

Instagram: https://www.instagram.com/Breathefreeworld/

3)Header element represents the introductory content and here it contains table using table element with class named body-table and style 100%width. Tr element represents a row of cells and the element represents header cell in a table.

4)Td element represents the data cell in a table. Colspan attribute defines the number of columns a cell should span. It allows the single table cell to span the width of more than one cell. H1 tag is used here for the selected topic's name to be the heading of the content. Pre element represents a block of preformatted text, in which structure is represented by conventions rather by elements, and in this the text is aligned to left in which course outcomes of the selected topic is displayed.

5)Td colspan =2 is used in which iframe i.e., nested browsing content is included using src attribute linking another html file AnotherFile.html with width 800 and height 400(as per

user). Again the element is used for default.asp hyperlink which opens in new page because of usage of target= "_blank" for previous and next page options, which are positioned left and right.

6)Font family for the body cross origin , calibrated, open sans, sans-serif,hurme_geometric_sans_1bold and hurme_geometric_sans_1regular, with background colour #006eb8 (Rebica Purple). In element class navbar css is given using width, background-color, overflow, align-self attributes. Given similarly for. navbar a using float, padding, color, text-decoration, font-size tags. Hover selector is used to select elements when you mouse over them. Border-collapse is used to select a table's border model which collapses here.

7)Coming to feedback link along with rel attribute with href of an image for icon. Meta and name attribute are used viewreport and content respectively. CSS is external which is already explained contains related feedback too.

8)Aside tag is again used for representing the feedback section of the page. Br tag is used for a line break. Again the form element is used as the feedback is supposed to be in this format. Action attribute giver the url of a program that processes the form information. The HTTP method attribute for that the browser uses to submit the form.

9)Input element represents a typed data field, usually with a form control to allow the user to edit the date. Label element which is used for the caption in the user interface is used for email and feedback.

10)Text area element represents a multiple plain text edit control for the element's raw value. And button element for submitting.

<u>APPOINTMENT PAGE DETAILS</u>

1) Here the title and type would be same as the previous page.

2) Coming box1 background colour is white and text colour is black. Whereas margin is set to auto. Borders of solid white with 3px on all sides. Margin is 8px 0px. Coming to padding given is 12px 20px and. Font Family : Arial, Helvetica, sans-serif.

3) Button details: Background colour green (#4CAF50) , colour white, padding 14px 20px, margin 8px 0px, font-family Digital Font, cursor pointer.

4) H2 tag is used, with no text decoration, text area, date time is also used

5) Everything entered in the appointment box is mandatory to fill.

6) User can book an appointment by clicking directly to book and appointment option on the right side locked bar, or down the page there is an option for the same plus one more option at the top of the page as "Doctor's Appointment". User can also go back to the same(Home) page for which a button is provided.
